Tweets Tech Company

For Information and Communications Technology Limited Liability Company (LLC)

2023 – 2015

About Us

Tweet Tech is a leading company in the field of internet services and mobile application development. We are steadfast in our commitment to delighting our esteemed clients by transforming their visions into captivating and masterful works of art. Our aim is to assist them in achieving their business and marketing goals and spreading them worldwide. Operating within the dynamic sectors of mobile application and web design and development, we understand that innovation and a departure from convention are paramount. Therefore, Tweet Tech has established a distinctive policy that positions us as a frontrunner in this field, both within our local landscape and across the broader Arab region.

> Tweet Tech was founded in 2015 by a group of young Palestinian entrepreneurs, since its inception, the company has swiftly carved out a niche for itself in the local and Arab technological and artistic market. In record time, Tweet Tech has built a strong client base, leveraging its expertise in the field, which spans over a decade.
> Tweet Tech offers a comprehensive range of mobile and web services and products, tailor-made to meet the specific needs and objectives of its clients. The company is duly licensed and registered with the Ministry of National Economy under the number 563157510 since 2015, and its main headquarters are located in the Gaza Strip.

We embrace quality and excellence as our motto in all of our services and operations. We are constantly striving to keep up with the fast-paced technological advancements in all fields, consistently aiming to enhance our work and performance to meet market needs and align with the ongoing technological evolution in the digital world.

Workforce

At Tweet Tech, we have a team of highly qualified designers, programmers, technicians, and IT experts who operate at the most proficient and top-notch levels in the fields of website development, mobile applications, networking, and internet technologies. Our goal is to deliver exceptional services that achieve our clients' objectives.
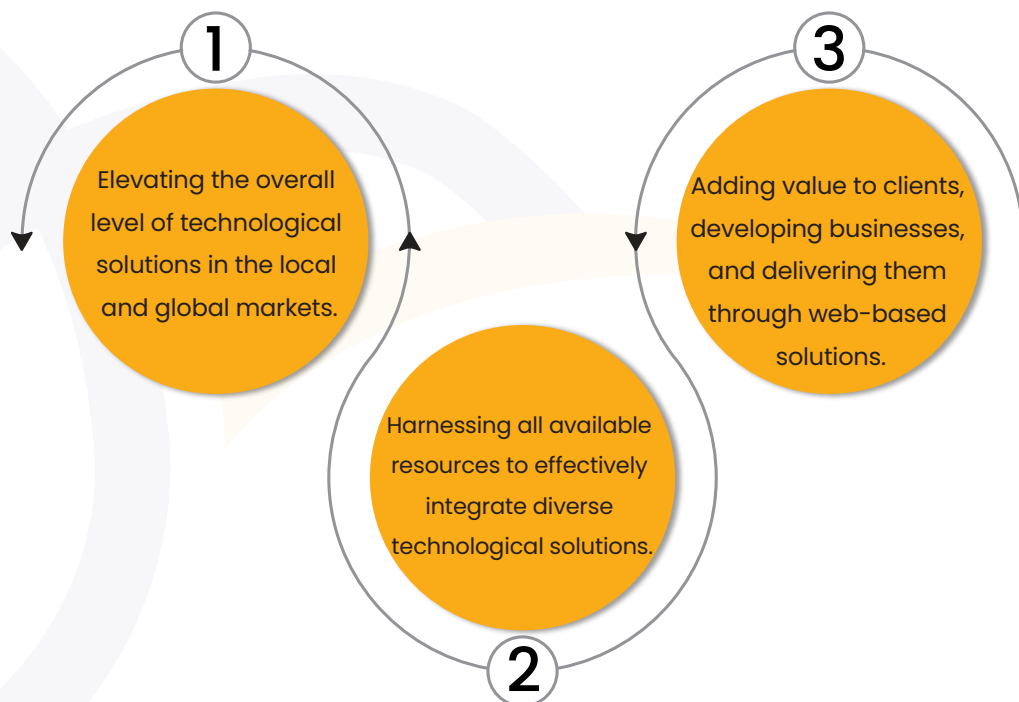

Our Commitments

At Tweet Tech, we are committed to providing the highest level of efficiency and offering the latest cutting-edge technologies worldwide, which reduce the overall cost and give our clients a competitive advantage over their competitors.

We also commit to delivering a wide range of hosting services known for their reliability and dependability to our clients.

Our Objectives

From the outset, Tweet Tech has strived to define its objectives clearly and consistently, which can be summarized as follows:

1
Elevating the overall level of technological solutions in the local and global markets.

2
Harnessing all available resources to effectively integrate diverse technological solutions.

3
Adding value to clients, developing businesses, and delivering them through web-based solutions.

The rapid evolution in the field of information technology demands sincere and strenuous efforts. As a specialized company in this field, we continually strive to enhance ourselves and create advantages through our experience in both the local and Arab markets. Our successful projects guide us towards the right path that aligns with the ever-changing nature of information technology. We always go the extra mile to expand the scope of innovation and reach a high level in technological solutions.

Our Objectives

Our primary specialization lies in the development of smartphone applications for both major operating systems, in addition to website programming.

Hosting websites through secure and specialized servers, supporting various global companies, and domain name registration of all types.

Providing Short Message Service (SMS) for groups and segmented advertising messages based on gender, region, etc. This service allows subscribers to send SMS to any mobile worldwide via the internet.

Managing advertising campaigns on social media platforms with targeted marketing plans, including design, content management, campaign monitoring, and customer response management.

Offering web and internet products, including Content Management System (CMS) solutions.

Providing design and video production services in all forms, such as motion graphics, editing, aerial photography, and more.

Customer Relationship Management (CRM) solutions and call center services. Electronic marketing and Search Engine Optimization (SEO).

Voice messaging services (SMS Voice), with a minimum duration of 30 seconds, broadcasted on landline and mobile phones.

Digital marketing on global platforms like WhatsApp, Instagram, Twitter, Facebook, and Google, as well as solutions for supporting online businesses and customers.

Remote control through server messages (CONTROLLER SMS).

4 Agri Store App

At Agri Store, we offer you a unique, pioneering, and user-friendly shopping service for everything related to agriculture and animal husbandry. Agri Store presents you with everything available in the Palestinian market under one roof, allowing you to shop freely from a wide range of agricultural products and more in the world of agriculture and animal production. Agri Store combines numerous diverse features within it, providing you with easy access to all products from various stores, enabling you to browse, purchase, track orders, and add reviews and opinions through it.
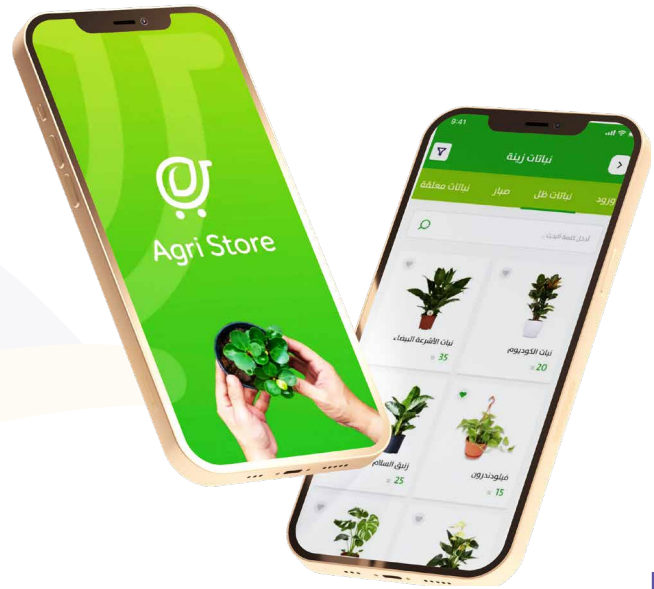

Why do you need Agri Store as a company or as Wholesaler?

- Agri Store is the first shopping platform for Agriculture products in Palestine, combining authenticity and modernity simultaneously.

- You can add an unlimited number of products to your store, set prices, and create discount coupons for your valued customers when they subscribe to Agri Store.

- You can reduce transportation costs and deliver your products with minimal error rates.

- Agri Store will map a delivery route to facilitate the product delivery process to your customers as quickly as possible.

- You can set up alerts and advertise products without the need for advertising agents, simply by clicking the 'Order' button.

- You can find all the information about your orders by time, date, nursery name, and address on a single page without the need to review multiple documents.

- All agricultural and animal products are at your fingertips under one roof.

- You receive daily notifications and alerts about the best offers, latest news, and updates on all available products and varieties.

- You can browse company offerings and choose the price or offer that suits your needs.

- You can browse, categorize, and search for a specific product or company.

- You can track the status of your orders.

- The program includes real product images with complete and simplified descriptions.

- You can also add products to your favorites list for later viewing.

5 Dawreha Platform

Project Overview

An online platform for e-commerce of used items. We are talking about furniture, electronics, and even clothing that we no longer use, as well as items stored in our homes or garages. Through the online platform (website and mobile app), we aim to facilitate the process of selling used items at the best prices.

Sorting available items by:

- Geographic location, making it easy to find items closest to you using maps.

- Categorization by type, such as office furniture, home furniture, electrical appliances, electronics, clothing, shoes, accessories, antiques, and more.

- Sorting by price to help users find items within their budget.

The ability to rate and review sellers based on the buyer's experience, the option to follow a seller's account to keep track of their listings.

- Using a 5-star rating system.

- Account rating is based on credibility and information availability.

- Upon registration, the seller or buyer is asked for basic information, including first and last name, primary address, and phone number. Completing additional secondary information provides them with additional scores, including email and, if available, the precise address and the name of the store.

Our platform aims to provide a convenient and efficient way for users to buy and sell used items, promoting sustainability and affordability in the process.
